

## Geography 360 – Autumn 2016

### First day!

There were no formal slides today. This isn't a substitute for your own notes, but I wanted to give you a few of the URLs we looked at:

The class Syllabus: please read it!

<https://canvas.uw.edu/courses/1066006/assignments/syllabus>

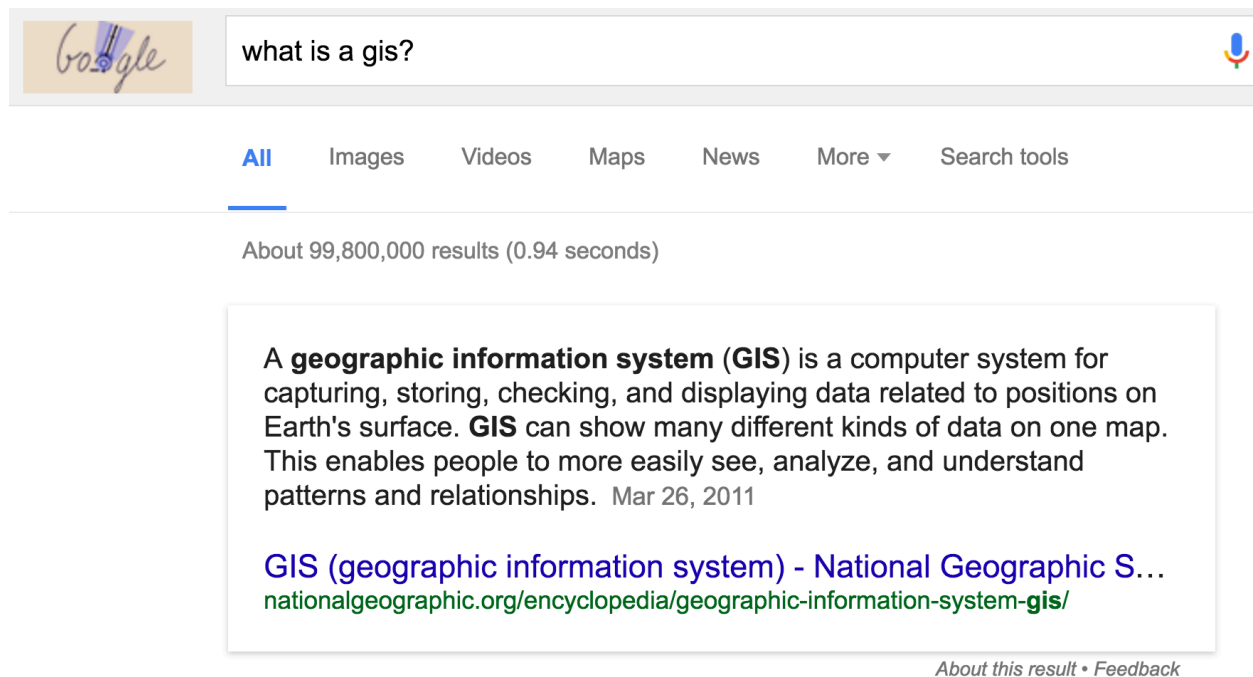

We stressed the holistic natures of GIS: It is science, humanities and arts, and technique. It is practice and theory feeding off of each other. It is the unity of lecture and lab.

Class readings and schedule--This is where you find many of the readings and the class slides

<https://canvas.uw.edu/courses/1066006/pages/schedule-for-readings-and-themes>

Stamen Design's watercolor webmap:

<http://maps.stamen.com/watercolor/#14/47.6406/-122.3217>

We had you draw world maps...

Also, we looked at a few upcoming things in the schedule.

Welcome to our little mapping society!
